Symbol

A mark of identity, memory, and time

The Origin — Ice Maker Group symbol is inspired by the form of a fingerprint — a universal sign of individuality, continuity, and trust. Just as every fingerprint is unique, the symbol represents the distinctive nature of each customer's experience with Ice Maker Group.

The symbol is formed from **identity and overlap**, where each **path and line** is not merely a design element — it represents a moment in time. Ice Maker Group welcomes and the memory of the world's most valued to serve.

just as no two fingerprints are alike, so too Origin — Ice Maker Group welcomes. Each line serves a

The symbol is not static; it is a representation **Ice Maker Group — calm, calmer, and cold.**

Colour Palette

A chromatic suite of nature and fire.

The Infinite colour system is grounded in natural elements — earth, water, stone, and light — chosen for their timeless warmth and their quiet confidence.

Bronze Earth and **Gold Sand** sit at the heart of the palette, evoking warmth, groundedness, and permanence. These tones reference clay, terracotta, and sunlit landscapes, colours historically and universally associated with the warmth of human touch.

White Agate offers contrast and clarity, corresponding to light, stone, and reflective surfaces — a crisp, pure, and sophisticated counterpoint.

Slate anchors the palette in strength and depth, a cool, neutral tone that provides visual gravity and refinement.

Forest and **Blue** are accent tones — used sparingly, to suggest life, nature, and calm. They offer moments of contrast that feel grounded and alive.

Together, these colours create a visual system that is both sophisticated and approachable, at home in a boardroom, a design studio, or a quiet moment of reflection. Versatile, timeless, and inviting.

THE EXPERIENCE

1. A Holistic Experience P. 63

A Holistic Experience

About

[illegible] is not a single touchpoint but a continuous experience. It was designed to feel reliable, consistent, and quietly confident, even with unknowns. Its success is demonstrated.

Each point of entry, with the same story in its own language. The digital experience unfolds as an immersive journey. The boutique is a destination that is more visual and breathing. Eager, warm, and inspiring, welcoming, and as the brand's voice has changed, and there, and events become the foundation of genuine encounters. Different locations, one accessibility.

This is the principle of a world, before applied across every surface. The subtle of language. Here is the core idea: a logo, type together, and the same imagery from a film to a Paper Aeroplane window.

What binds them is consistency: every gesture, every image, every space tells the same story. The Monument Regular, Light, Letters combined to detail and invisible through design. The typography conveys that it's through the craftsmen and the [illegible] through a few continued, connecting each image. The Black Orange Monument is the word it carries itself.

A holistic experience is therefore not a part of marketing but a single, coherent world. Whatever we [illegible] are there the brand is it — and we are always in control now. Marketing is the world.
